ORGANIZATION OF THE CZECHOSLOVAK GOVERNMENT:
MINISTRY OF TECHNOLOGY

The following is the organization of the Ministry of Technology and units subordinate to the ministry.

MINISTRY OF TECHNOLOGY, IN PRAGUE

Minister

Dr Emanuel Slechta.

Cabinet of the Minister

Chief: Eng. Vaclav, senior departmental counselor.

Deputy: Dr Zdenek Spurny, departmental counselor.

Functions: Personal liaison between the minister and the various components and agencies of the state technical administration; liaison with the various parties of the National Front; intervention functions.

Presidium Department

Chief: Dr Vaclav Jelan, ministerial counselor.

Group I - Plenipotentiary for Construction Planning

Chief: Eng. Miloslav Tejc, plenipotentiary for the Two-Year Plan.

MINISTERIAL

Section Z/1

Chief: Engr Frantisek Zelinka, ministerial counselor.

Functions: Coordination and management of planning; supervision of plan fulfillment, contact with central planning agencies; solve problems resulting from the activities of Sections Z/1, Z/2, Z/3 and K; planning for highway and bridge construction.

Section Z/2

Chief: Engr Karel Hajek, departmental counselor.

Functions: Land construction planning; plan for housing construction and related technical, as well as technical-administrative, questions; plans for raw materials, manpower, investments, and power.

Section Z/3

Chief: (temporarily): Engr Frantisek Boucek, senior ministerial commissar.

Functions: Water management and waterways construction planning; plans for raw materials, manpower, investments, and power.

Section K

Chief: Engr Oldrich Sitina, departmental counselor.

Functions: General and special matters concerning the management of allocated building materials for land construction, roads, bridges, dwellings, water constructions, and in the field of state technical administration in general.

Section B

Chief: Dr Karel Janu.

Functions: Nationalization in the field of constructions; national administration in construction enterprises; organizing the national construction enterprises.

Group II - Organization and Propaganda

Chief: Temporarily, chief of the department.

Section P/1

Chief: Frantisek Marecek, senior ministerial commissar.

Functions: Organizational matters of the Ministry of Technology, subordinate and connected offices and agencies, and of the other branches of the technological state administration; supervision of service performance; work program of the state technological administration; study programs; scientific congresses; military and organizational matters; supervising the economic office of the ministry and the administration of auxiliary agencies; all matters concerning official vehicles.

STAT

Section P/2

Chief: Engr Jaroslav Barta, senior departmental counselor.

Functions: Specialized press matters; information and propaganda service; specialized publications; supervision of the ministerial library and archives; editing the *zpravy verejne sluzby technicke* (Public Technical Service Reports); representation of the Ministry of Technology at celebrations and similar events; honorable titles and distinctions; liaison with parliament and the office of the president of the republic.

Group III - Personnel

Chief: Jaroslav Kraif, departmental counselor.

Section P/3

Chief: Engr Jaroslav Kudrnka, departmental counselor.

Functions: Legislative and normative matters of the working conditions of public workers; compensation for service expenditures; records on personnel status; personnel, qualification, and disciplinary matters of employees of the Ministry of Technology and of the offices and institutions belonging thereto; systematizing of personnel placement in these offices.

Section P/4

Chief: Engr Jaroslav Libensky, ministerial counselor.

Functions: Personnel, qualification, and disciplinary matters of the employees of the state technological administration in lower echelons; systematization of service positions in the lower echelons of the state technological administration.

Group IV - Budget and Finances

Chief: Engr Josef Vostrel, ministerial counselor.

Section P/5

Chief: Dr Josef Janata, senior departmental counselor.

Functions: Financial and budget matters; supervision of accounting and financial management within the jurisdiction of the Ministry of Technology; liaison with the Ministry of Finance and the Supreme Accounting Control Office; supervision of the ministerial accounting office; management of the presidium treasury; over-all reports of state property, movable and immovable.

Section P/6

Chief: Dr Karel Machacek, ministerial counselor.

Functions: Legislative and normative matters in the field of budgets and finances; war damage; confiscated property and reparations matters in so far as they concern the Ministry of Technology; long-range plan concerning financial matters of the state technical administration.

STAT

Commissar for Economy

Section U

Chief: Dr Otto Bosek, ministerial counselor

Functions: Supervision of adherence to economy regulations and supervision of the Supreme Accounting Control Office.

Department I - Water Management

Chief: Engr Josef Jirousek, senior departmental counselor.

Department I - Water Management and Waterways

Chief: Engr Ladislav Vavrouch, ministerial counselor.

Section I/1

Chief: Engr Otta Cvrk, Senior Departmental Counselor.

Functions: General, financial, and budgetary matters of the department; apportionment of building materials; records and statistics concerning construction; collaboration with the plenipotentiary for the Two-Year Plan; studies; affairs concerning the state hydrological institute; iron structures connected with water constructions.

Section I/3

Chief: Engr Josef Feitsker, ministerial counselor.

Functions: Regulation, maintenance and administration of rivers as well as making them navigable, according to law, hydrographic and flood service affairs.

Section I/4

Chief: Engr Jiri Zemina, departmental counselor.

Functions: Design and construction of canals; design, construction, reconstruction, and administration of harbors, transloading areas, and harbor zones in foreign countries.

Section I/5

Chief: Engr Josef Blabolil, ministerial counselor.

Functions: Organization, maintenance, and administration of rivers and streams; construction of protective dikes and reconstruction of weirs according to law.

Section I/6

STAT

Section I/6

Chief: Engr Joseph Peyples, senior departmental counselor.

Functions: Design, construction, maintenance, and repair of dams for all water management purposes.

Section I/7

Chief: Emil Polak, departmental counselor

Functions: Utilization of water power; Collaboration with the Ministry of Industry; design, construction, maintenance, and administration of state hydroelectric plants.

Group II - Water Management and Cultural-Technical Affairs

Chief: Engr Vladimir Prochazka, ministerial counselor.

Section I/2

Chief: Dr - Engr Vilibald Bezdicak, departmental counselor.

Functions: Planning of water construction; general plan for management of water; collaboration with the ministries concerned.

Section I/8

Chief: Engr Bedrich Prokopec, ministerial counselor

Functions: Land improvement of every type; cultural-technical research.

Section I/9

Chief: Engr Karel Sevcik, ministerial counselor

Functions: Providing cities and towns with water for drinking and for general use; Purgative spas.

Section I/10

Chief: Dr Vaclav Sticha, departmental counselor.

Functions: Drainage and sewage facilities in cities and towns; construction of sewage disposal plants; public bathing facilities.

Section I/11

Chief: Engr Arnost Kutal, senior departmental counselor.

Function: Legal problems connected with water; purification of water supplies.

STAT

Department II - Highways and Bridges

Chief: Engr Jan Kopriva, ministerial counselor

Group I - Highways

Chief: Engr Emil Krupsky, ministerial counselor.

Section II/1

Chief: Engr Vratislav Stumpf, senior departmental counselor.

Functions: Organizational, personnel, and budget matters concerning roads and bridges; general, norm, and police transport matters concerning highways; road marking; statistics and records on roads; road information service; road closing; expropriation and reappropriation of highways.

Section II/2

Chief: Engr Milos Krutina, senior departmental counselor.

Functions: Maintenance of state highways; central administration of quarries of the state highway administration; central administration of motor vehicles, machinery, tools, shops, garages, storehouses, and roadside sheds of the state highway administration; management of resinous substances, motor fuels, and rubber tires.

Section II/3

Chief: Engr Bohuslav Rozkosny, senior departmental counselor.

Functions: Examination of all road project proposals and all preparatory details pertaining thereto; issuing of official road maps; collaboration in countryside planning; cooperation with Department VI in licensing construction close to highways; research concerning, and investigation of, road matters; census of traffic volume and classification of roads.

Section II/4

Chief: Engr Josef Sozan, senior departmental counselor.

Functions: Construction and arrangement of first-class state highways; approval and ratification of annual construction programs and individual projects; administrative permits for construction estimated to cost more than 3 million crowns; approval of large buildings and approval of restricted plans; matters of the East-West, Breslau-Vienna, and Cheb-Liberec highways; completion of the Prague-Burpolec section of the East-West Highway.

Section II/5

Chief: Engr Jaromir Chrovec, senior departmental counselor.

Functions: Construction and arrangement of second-class state roads; approval of yearly construction programs and detailed projects; administrative permits for construction which will cost above 3 million crowns; approval of large construction projects; matters of pay and fixing of prices for roads and bridges; distribution of paving materials.

STAT

Section II/6

Chief: Engr Jan Skala, senior departmental counselor.

Functions: Matters pertaining to highways not under state ownership; approval of annual programs of subsidized highway construction inspection of plans, and granting of contributions for the construction of nonstate highways; approval of large construction projects; auditing of accounts of all other construction.

Group II - Bridges

Chief: Engr Evzen Poppicil, senior departmental counselor.

Section II/7

Chief: Engr Jaroslav Buchtele, departmental counselor.

Functions: General matters concerning bridges; repair, upkeep, and reconstruction of bridges on state highways; matters concerning nonstate bridges and temporary bridges; records of bridges on public highways; catalogues, statements, and maps of bridges; allotment of building materials for roads and bridges; program of maintenance operations.

Section II/8

Chief: Engr Karel Lukas, technical counselor.

Functions: Plans and construction of bridges on state and nonstate highways; approval of yearly construction programs and construction; permitting of contributions for the building of nonstate bridges; approval of projects concerning bridges above 20 meters in length on state and nonstate highways; control of bridge construction and approval of large bridges on state and nonstate highways.

Section II/9

Chief: Engr Jeronym Prochazka, departmental counselor.

Functions: Technical regulations and norms for highway bridges; proposals for standard, typical, and model bridges; aids for preparation of proposals; judging of regular bridge projects and bridge construction of special types; research, testing of bridges.

Section II/10

Chief: Engr Jaroslav Skala, departmental counselor.

Functions: General plan and technical-managerial activities on roads and bridges; bridge and highway matters connected with the Two-Year Plan; reports and publication of specifications of buildings for contractors' bids.

Department III - Land Constructions, Obec Construction, and Rural Planning

Chief: Engr Vladimir Kazda, senior departmental counselor.

STAT

Group I - Rural and Local Planning; Housing Construction

Chief: Engr Jaroslav Cukr, architect, senior departmental counselor.

Section III/1

Chief: Engr Artur Ambler, departmental counselor.

Functions: Central direction of rural planning and co-ordination of specialized planning within the jurisdiction of the ministry; liaison with economic planning; architecture of engineering structures (highways, bridges, water management construction, etc.); administration of obec construction according to government regulations; underground urban construction.

Section III/2

Chief: Engr Frant. Dvorak, senior technical commissar.

Functions: Technical cooperation in completion of construction of housing and community sanitation; collective and emergency housing; support of public investments in residential construction.

Section III/3

Chief: Engr Ladislav Lapka, technical counselor.

Functions: State support for dwelling construction as well as granting aid for construction within the limits of laws; administration and control of construction of buildings where state aid has been granted; matters pertaining to building of state-owned dwellings.

Group II - Land Construction

Chief: Engr Josef Pokorny, senior departmental counselor.

Section III/4

Chief: Engr Jan Feigl, ministerial counselor.

Functions: Construction of buildings for state and public administration; building programs, plans, contracting for, and approval of, buildings of the Constituent National Assembly and of all central offices; office buildings for foreign state representations in Czechoslovakia and construction of buildings in foreign countries for official use of Czechoslovak representations.

Section III/5

Chief: Engr Jiri Petr, senior departmental counselor.

Functions: Construction of school and cultural buildings for universities, secondary, technical, higher elementary, elementary, maternal training, and boarding schools, as well as institutions in the realm of culture and the sciences, theaters, and physical culture; rebuilding of schools damaged by the war.

STAT

Section III/6

Chief: Engr Vaclav Krepel, ministerial counselor.

Functions: Health and social institutions in the jurisdiction of the Ministry of Health and the Ministry of Social Welfare; building of hospitals and medical and recuperation centers; spas, etc.; construction of institutions for war invalids, training schools for social workers, etc.

Section III/7

Chief: Engr Jindrich Kuttel, senior departmental counselor.

Functions: State and state-supported construction for agriculture and commerce (hotels, tourist hostels, market halls, warehouses, refrigeration plants, etc.); buildings for the Ministries of Agriculture, Food, Industry, Internal Trade, and Foreign Trade.

Group III - General Affairs and Administration of State Buildings

Chief: Engr Antonin Sareks, ministerial counselor.

Section III/9

Chief: Engr Frant. Petr, senior departmental counselor.

Functions: General technical and organizational matters within this department; cooperation in legislative matters concerning constructions of buildings; construction of artistically and historically important buildings; technical matters pertaining to building regulations and policing; documentation in the fields of construction of buildings and architecture.

Section III/10

Chief: Engr Karel Bohn, departmental counselor.

Functions: Budget, financial, and price matters; cooperation with the economic plan; planning of public buildings, manpower, and controlled materials.

Section III/11

Chief: Engr Bon. Kopa, senior ministerial commissar.

Functions: Administration of state buildings; approval of rental agreements for office space; procurement and assignment of buildings and of rooms for public purposes; matters of national cultural commission; cadastral survey of state-owned property.

Department IV - Research and Norms in Construction

Chief: Engr Jaromir Kazda, senior departmental counselor.

STAT

Section IV/1

Chief: Engr Jan Duchacek, departmental counselor.

Functions: General and budget matters of the department; research, standardization, and special construction of industrial, small business, and public buildings; approval and permits for new type construction; mechanization of industrial construction.

Section IV/2

Chief: Engr Frantisek Widemann, senior technical counselor.

Functions: Research, standardization, and special construction, primarily prefabricated, of dwellings and agricultural buildings; approval and permits for new-type dwelling construction and mechanization of such construction; technical equipment for construction and facilities for construction workers.

Section IV/3

Chief: Engr Vladimir Landkammer, senior departmental counselor.

Functions: General and special normalization matters in construction; cooperation with the other departments of the ministry; liaison with the Czechoslovak Norms Society; matters connected with the issuing of contracts.

Section IV/4

Chief (temporarily): Engr Miroslav Sura, ministerial commissar.

Functions: Research and experimentation in all branches of construction; authorization of experimental institutions; research in the field of building and raw materials, especially prefabricated, from the point of view of materials; questions concerning manufacture of materials and production capacity; departmental counseling.

Section IV/5

Chief: Conducted by the chief of the department.

Functions: Work organization on construction; general questions connected with prices in land construction; liaison with Supreme Price Office; matters connected with statistics and wage scales work-output norms on construction jobs; price index of building costs; cooperation in arranging expositions.

Department V - General Technical Matters, Machinery, and Electrical Equipment

Chief: Engr Vladimir Pycha, departmental chief.

Section V/1

Chief: Engr Frantisek Kosthum, ministerial counselor.

STAT

Functions: General and budget matters in the department; matters concerning civilian technicians, the Chamber of Engineers, and engineers' titles; general small-business and technical matters; matters concerning leased construction enterprises and independent building trades of a technical nature.

Section V/2

Chief: Engr Vaclav Kabelik, ministerial counselor.

Functions: Electrical equipment in state-owned and state-supported installations and buildings, in connection with renovation and administration of state and public buildings; cooperation with the Czechoslovak Electrical Engineering Association; labeling of electrical engineering products; General questions of electrical engineering and power.

Section V/3

Chief: Engr Oldrich Benes, senior surveying counselor.

Functions: Matters connected with the surveying service for rural and local planning, and for land, highway, bridge, and water construction; cooperation in acquisition, exchange, removal etc., of state-owned real estate; records and cadastral survey on state-owned property.

Section V/4

Chief: Engr Vladimir Karel, senior departmental counselor.

Functions: Fixtures and mechanical equipment in newly constructed buildings in state institutions and state-administered institutions; renovation and administration of state and public buildings; cooperation in discussions concerning norms and standardization of machine parts for plumbing and heating.

Section V/5

Chief: Engr Jaroslav Myslik, departmental counselor.

Functions: Mechanical equipment for water construction; road and construction machinery; mechanical equipment for refrigeration plants; cooperation in discussions and negotiations for normalization and standardization of parts for general and special machinery; heating technology and technical affairs of the Institute for Economical Utilization of Fuels.

Department VI - Legal

Chief: Dr Otto Bosek, ministerial counselor.

Group I - Administration and Law

Chief: Dr Karel Vancl, departmental chief.

STAT

Section VI/1

Chief: Dr Alexander Zukriegel, senior departmental counselor.

Functions: Opinions on legislative bills concerning other ministries and special attention to the unified working out of bills of the Ministry of Technology; determines jurisdiction of the Ministry of Technology; legislative and legal matters concerning civil technicians, Chambers of Engineers, the use of the title "engineer," and contracting regulations; legislative and legal matters concerning nationalized and national construction enterprises.

Section VI/2

Chief: Frantisek Carda, ministerial counselor.

Functions: Public laws; matters pertaining to highways and all legal matters concerning long-distance highways insofar as they do not belong under Section VI/3.

Section VI/3

Chief: Dr Vilem Zak, senior departmental counselor.

Functions: Legislative and legal aspects of rural planning and obsc construction; building regulations and construction in the Two-Year Economic Plan for agriculture; legislative matters pertaining to highways and long-distance highways and issuing of building permits for constructing highways and long-distance highways, and making decisions concerning plans for long-distance highways; legislative matters concerning expropriation of buildings and rooms for public purposes and decisions in appeals (complaints).

Section VI/4

Chief: Dr Ladislav Styrnsd, ministerial counselor.

Functions: Legislative and legal matters pertaining to water rights and execution of water law; books concerning water purification from the legal standpoint; arbitration on shipping of wood by floating decisions in matters of river control opening of water areas to the general public; cooperation in arranging water rights on state frontiers.

Group II: Economics and Legal Matters

Chief: Josef Netik, ministerial counselor.

Section VI/5

Chief (temporarily): Dr Depold Figer, departmental counselor.

Functions: Legislative and legal matters concerning renovation of buildings and other installations destroyed or damaged during the war or through the German occupation; legislative cooperation in state subsidies for housing construction and in general public installations for housing construction; reports on negotiations concerning disputes.

STAT

Section VI/6

Chief: Dr Vaclav Stetka, senior departmental counselor.

Functions: Private-law matters dealing with land construction and highways; legal matters of the administration of state buildings; legal matters of the taking over of houses and rooms for public purposes in so far as they do not belong under Section VI/3; taxes and fees; legal economic matters not assigned to other sections of the ministry.

Section VI/7

Chief: Dr Gothard Vlcek, ministerial counselor.

Functions: Legislative and legal matters pertaining to construction and waterways according to law. Water management constructions.

Section VI/8

Chief: Dr Josef Hribek, ministerial counselor.

Functions: Legislative and legal matters dealing with improvement of water-management and construction; agreements on arrangements about constructions where state contribution has been granted according to law and making announcements about them; examining of announcements given out by builders in place of negotiations.

Accounting Office of the Ministry

Chief: Bretislav Tobolar, accounting director.

Library

Chief: Alois Hoch, departmental counselor.

Administration of Auxiliary Offices

Chief: Frantisek Damborsky, senior office administrator.

Economic Office

Chief: Jan Zyka, senior office administrator.

STAT

T. G. Masaryk Hydrological Institute, in PragueChief of Institute

Engr Frantisek Kovarik, governmental counsel.

The institute is an administrative and scientific center for the hydrological service, serving the whole country. The hydrological sections of the Provincial National Committees in Prague and Brno, the offices of the Provincial National Committee in Ostrava, and the hydrological and meteorological institute in Bratislava are subordinated to it, from the specialized viewpoint. The aim of the institute is to organize the hydrological services and, on the basis of scientific research of atmospheric, surface, and ground water, and with the aid of the above-mentioned departments, to prepare a basis for systematic, economical exploitation of water and to reconcile the many claims made on the utilization of water (protection against the harmful effects of water, exploitation of water power, procurement of water for agriculture, industry, and navigation, supply of drinking water, and protection of water from pollution).

The institute has five laboratories: a hydrotechnical one for testing water construction, a laboratory for testing clays and methods for their processing, a chemical laboratory, a biological laboratory, and a bacteriological laboratory. The effects and quality of water in these laboratories are tested from every aspect of practical utilization.

The institute publishes the results of its work in the collection Vodopis CSR (The Hydrography of Czechoslovakia), containing mainly statistics and descriptions, and the collection Prace a Studie (Works and Studies), which is a summary of its research. The institute also publishes an annual Hydrologicka Bibliografie CSR (Hydrological Bibliography of Czechoslovakia) within the framework of the International Association for Scientific Hydrology.

State Institute for Economical Utilization of Fuels in Prague

The institute experiments with fuels with a view to their exploitation from every angle. Supplementary assignments of experiment and research activities on road-building materials and various raw materials for glass, lubricating oils, motor fuels, as well as in refrigeration and air-conditioning technology.

The institute has five specialized sections:

- I - Home and Small-Business Heating.
- II - Steam Boilers and Central Heating.
- III - Refrigeration and Air-Conditioning Technology.
- IV - The Chemistry and Technology of Fuels and Their General Analysis.
- V - Construction and Chemical-Technical.
